

I

THE THEFT

Nineth of April, 1940, A successful Nazi attack on Denmark resulted in thousands of deaths. Among the casualties was Roman André, a Nordic military officer.

Present Day : 19th February, 1968,
At Enzo's cottage in Copenhagen, Denmark.

A mysterious duo rings the bell. On opening the door, a man shows Enzo their identity card. Detective Freud and Max Planck Institute's professor Astrid, who is a biologist shows Enzo a CCTV footage of Max Planck Molecular Genetics Institute of Germany. Two men invaded the institute and stole a few important archives.

Upon further investigation, Freud found that one of those men had similar features to Roman André, Roman's history was connected to Enzo. He was a Nordic military officer and worked with Enzo, they both were great friends and no one could identify him better than Enzo Owens so he brought the footage to him. Shocked Enzo refused to believe Roman's presence as he died and his body was burnt, there was no chance of survival.

While investigating the theft area, Freud found a piece of sheet :

BNPTPDFWAOVOTCZSK

Archive is the key

"What could this possibly mean, Enzo?"
"Sounds like a cipher to me, I used to be
good at it."

PS : Solve it
